

Many leaders today find it challenging to cope with the increasing pace of change, much of which is driven by the digitisation of products, processes and business models. Individuals who are successful navigating through the opportunities and challenges of market disruption are referred to as agile leaders. The Agile Leader 360 aims to assist leaders at any level of an organisation gain a better understanding of how they are truly perceived by others and thereby improve their agile leadership potential. The Agile Leader 360 measures a leader based on the Agile Leader competencies; Humility, Adaptability, Engagement and Visionary, as well as the Agile Leader behaviours; Hyperaware, Making Informed Decisions and Executing at Speed.
