PBC & Hogan

We predict workplace performance.

About PBC

PBC is a multidisciplinary global consulting firm with over 30 years' experience in the delivery of best practice solutions aimed at maximising the potential and demonstrated behaviour of individuals, teams, leaders and organisations.

PBC provides customer-focused, evidence-based people solutions that enable organisations to identify and develop key talent, build better teams, drive leadership capability, and enhance organisational performance. We employ highly skilled and experienced consultants with backgrounds in psychology, business consulting and human resources. Our international network of partners and distributors enable us to provide seamless global solutions.

PBC is the Distributor of Hogan Assessments in Australia and New Zealand and the author of a range of diagnostics including the Hogan 360 Suite, Agile Leader 360, Graduate Talent Assessment (GradTA), High Performing Team Assessment (HPTA), and co-author of the Hogan Safety Climate Survey. We are the Australian distributor of Meta, a measure of entrepreneurial talent, the Risk Type Compass, and integrity assessments including MiNT and WRISc.

About Hogan

Hogan uses the powerful science of personality assessment to support organisations to select the right people, develop talented employees, build great leaders, and impact the bottom line. Grounded in more than four decades of validated research, Hogan assessments were the first to scientifically measure personality for business. Built on rigorous research standards and ethics, Hogan continually challenges itself to ensure that the highest standards of technical quality have been maintained with all published assessments.

The Hogan Assessment inventories are well regarded and recommended by leading academics worldwide. The inventories were developed to assess working adults and the research complies with EEO, anti-discrimination and diversity requirements.

With products and services in 180 countries and 54 languages, Hogan remains the industry leader in the science of personality.

Development

Our development solutions drive real behaviour change as we use evidence-based diagnostics and highly effective feedback and coaching methods for individuals and groups.

PBC believes that all talent can be nurtured and with self-awareness, effort and persistence, employees can develop and improve. It is vital that people understand the difference between the way they see themselves and the way they are seen by their peers, managers, and direct reports.

PBC's global development solutions use a combination of diagnostics, such as personality assessment, multi-rater/360, and our consulting services to build capability and performance from graduates to high potentials and senior leaders. Our solutions cater to individuals and teams, and inform organisational development programs.

Business Analytics

PBC's Business Analytics uses people and organisational data to produce evidence-based strategy and key data to improve decision making.

Teams

We use evidence-based diagnostics such as aggregated individual data, team data and external benchmarks to understand team capability. We then implement targeted team building programs to address team development opportunities and drive organisational performance.

PBC's team solutions support team development and success through targeted solutions that focus on building high performing teams, improving the effectiveness of newly formed or agile teams, getting dysfunctional teams back on track, enabling 'joint venture' teams to be effective, and encouraging collaboration across different functional teams.

Organisational

All organisations rely on two key groups of people to be successful: their employees and their customers.

PBC's global organisational solutions enable you to measure (and re-measure) what your employees and stakeholders think. We can also help you understand safety attitudes and behaviours across your whole organisation.

PBC's organisational solutions provide meaningful insight into the strengths and challenges facing the business. Armed with this information, they can then put in place targeted plans to address any issues and measure improvement over time.

Using data analytics, our business consulting services help to incorporate these insights into business improvement initiatives to drive performance and improve bottom line results.
